

Managed VoIP Minutes and Ports Best-in-class calling experience on our leading Internet backbone

Tata Communications' Managed VoIP (MVoIP) Minutes and Ports deliver end-to-end managed Internet telephony solutions. We combine our core Internet backbone strengths with the termination capabilities of our Tier-1 partners to deliver a best-in-class calling experience.

Existing International Calling Challenges

- _ Inconsistent voice quality
- _ Poor call completion
- _ High TCO
- _ Inefficient management of multiple vendors
- _ Varying call volume patterns

Flexible Service Offerings

We provide two commercial models that are customized to meet the varying call volume patterns of customers.

MVoIP Minutes

MVoIP Minutes is a commitment-based, zero-rental, bundled solution designed for large and predictable call volumes. Billing is on a per minute basis, based on call volume.

MVoIP Ports

MVoIP Ports is a no-commitment, fixed-rental, bundled solution designed for small or unpredictable call volumes. You pay a monthly rental for a specific number of ports. Per-minute charges are fixed and independent of call volume.

Key Service Features

- _ PSTN termination through multiple international Tier-1 partnerships
- _ Committed network uptime
- _ Capacity upgrade according to requirements
- _ Flexible commercial models
- _ Single point of contact for contracting, implementation and billing
- _ Centrally-managed, proactive 24x7x365 support
- _ Superior voice quality
- _ Fully managed, reliable, end-to-end solution
- _ Customized to meet business requirements
- _ Flexible commercial models
- _ Lower management costs

End-to-end managed Internet telephony
