

# VPN Lite

## End-to-end, managed VPN services for companies throughout India

**VPN Lite offers an easy-to-use, cost effective, virtual private network (VPN) service for standard data requirements. This bundled service targets small to medium-sized businesses requiring basic VPN services for running business applications.**

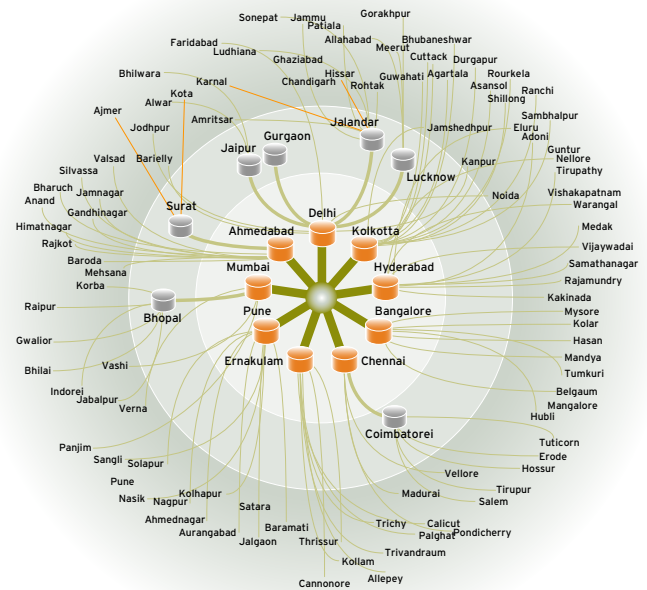

VPN Lite provides an end-to-end, integrated, IP-based solution with a fixed class of service (CoS) based on advanced multi protocol label switching (MPLS) technology. With integrated Ethernet access at all remote branches, customers can leverage a scalable option to meet changing bandwidth needs.

### Affordable, Domestic VPN Services

Tata Communications offers comprehensive coverage throughout India with a three-tier, hierarchical, MPLS network and additional metro Ethernet points-of-presence (PoPs) within India for unparalleled VPN connectivity.

### International Reach

In addition to domestic coverage, Tata Communications provides high-level VPN service outside India with PoPs in over 20 international locations throughout North America, Europe, the Middle East, Africa, East Asia, Southeast Asia, and Australasia. Additionally, Tata Communications extends its MPLS network reach to over 50 countries worldwide through select alliances with third party service providers.

## VPN Lite

### VPN Lite Service Features

- \_ Service available across Tata Communications' meshed MPLS network covering 120 cities
- \_ Managed, end-to-end, turnkey solution for full service lifecycle support
- \_ MPLS quality of service (QoS) features for business data requirements—suitable for pure data applications on CoS 3/4
- \_ Fully meshed, redundant core backbone for high availability
- \_ Integrated Ethernet access on multiple media, including fiber and wireless options
- \_ Flexibility to route private IP addresses
- \_ Port speeds from 64 Kbps to 1 Mbps at central hub and from 64 Kbps to 512 Kbps at remote branches
- \_ Online web portal for site uptime reports with secure Internet access from anywhere in the world

### Robust Layer 3 Service—Benefits of VPN Lite

VPN Lite provides a set of sites interconnected through a robust, MPLS core network. Customers benefit from a single consolidated price for chosen bandwidths executed as a standard configuration on Tata Communications' meshed, Layer 3 network.

### Additional Benefits

**Cost-effectiveness** - Streamlined service with minimal Service Level Agreements (SLAs) using an economic router solution that delivers customer savings.

**Plug-and-play solutions** - Simple network configurations ensure fast provisioning and service activation.

**Security** - Private VPN network with MPLS inherent robust security.

**Maximum uptime** - End-to-end, managed service maximizes uptime commitments.
