

# India Private Line

## Leverage the greatest network densities within India

**When you need seamless, time-sensitive transmission, Tata Communications' India Private Line (IPL) Service provides the solution. Our IPL Service provides one of the most secure network environments available.**

### Secure, Low-Latency Solution

Our IPL Service supports a variety of telecommunication applications, including point-to-point voice, data and video transmission. When you need connectivity you can count on, we deliver a highly secure, reliable and dedicated network through leased circuits backed by SLAs.

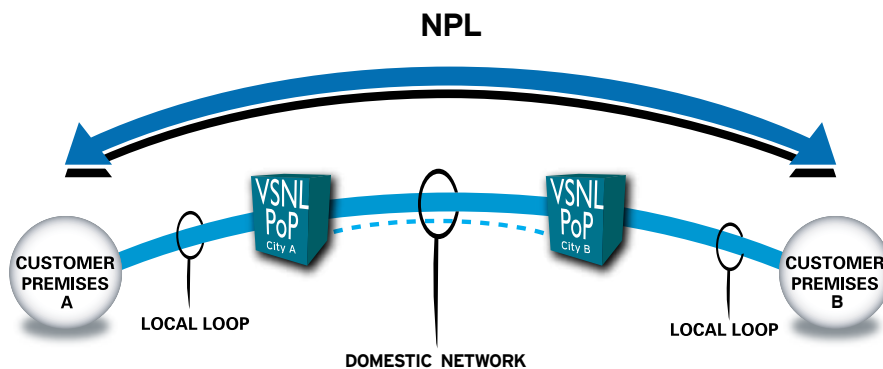

### Unparalleled Coverage

An exclusive connectivity service, our IPL is delivered on our national long-distance backbone composed of over 40,000 km of optical fiber, and over 300 PoPs across India. Our IPL Service establishes an integrated network to handle a wide range of demands within the structure of your wide area network.

### Existing Domestic Private Line Challenges

- Mission-critical applications that require customized service levels
- Shared networks that compromise on security
- High network maintenance costs
- Excessive downtime
- Lack of end-to-end support

Support time-sensitive voice, data and video

**ENTERPRISE**

# India Private Line

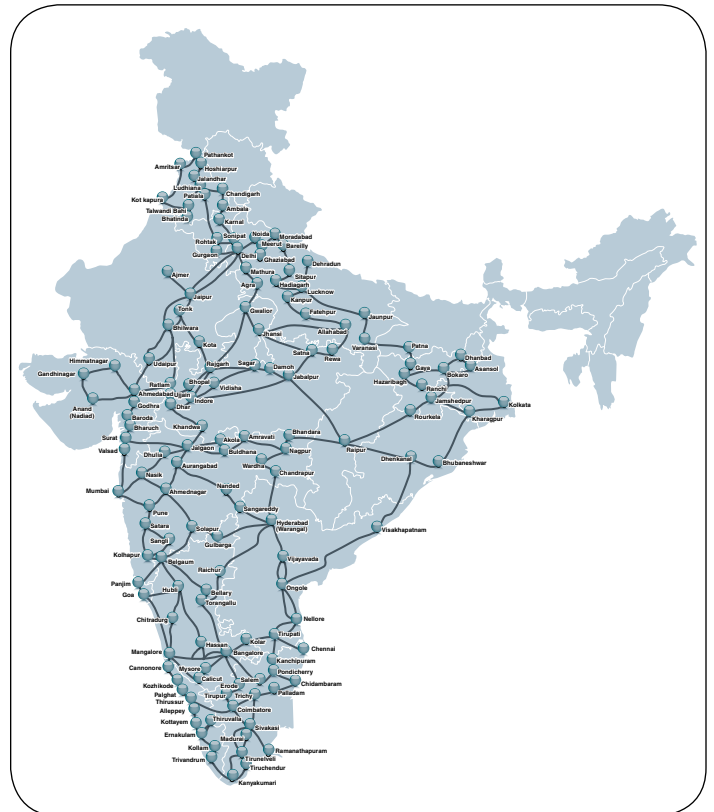

## Key Benefits

- \_ Dedicated connectivity for guaranteed performance and security
- \_ End-to-end Service Level Agreements (SLAs) ensure guaranteed installation time and availability
- \_ Virtually error-free data exchange increases data throughput
- \_ Diverse bandwidth options service varied customer applications
- \_ Scalable capacity delivers enhanced operational efficiency

## Key Features

- \_ Permanent dedicated link at fixed rental cost
- \_ Delivery over our seamless, national, long-distance backbone comprised of over 40,000 km of optical fiber
- \_ Over 300 PoPs across India
- \_ Deployed on cost-efficient and highly scalable Dense Wavelength Division Multiplexing (DWDM) technology
- \_ Protected Services with less than 50 ms auto switchover
- \_ 24x7x365 Customer Service and Network Management Center ensure optimum network performance
- \_ Single point of contact for contracting, implementation, support and billing
