

WebEx™ Meeting Center

Real-time information and presentation sharing

WebEx Meeting Center from Tata Communications is ideal for interactive meetings such as ad campaign rollouts, new product launches, project meetings, legal evidence sharing, and strategic planning sessions.

Versatile Collaboration Tools

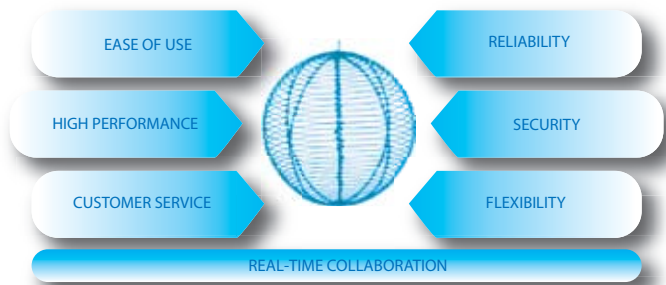

With the ability to share visual presentations, present slide shows, collaborate through whiteboarding, direct Web tours, and share applications, WebEx Meeting gives you the power to conduct intimate collaborations or wide reaching-presentations.

Meetings that previously required days of planning, coordination, travel, and setup can now occur immediately, without extensive lead time or expense.

Take Control of Your Meetings

Our simple-to-use interface puts you in control of all aspects of the conference. The option to share control gives participants the opportunity to make live changes to documents or show something to the group from their own desktops.

WebEx Meeting combines the convenience and security of automated conferencing with a powerful Web collaboration tool set that enables more efficient and effective day-to-day meetings.

Successful Results Every Time

WebEx Meeting is backed by exceptional customer service and advanced security features, which ensure that every WebEx Meeting session is successful.

Complimentary training and online demonstrations are available before scheduling your first call. Should you require help at any time during your WebEx Meeting session, an operator is standing by 24x7 to provide assistance for both the audio and visual aspects of the conference.

Applications

- _ Small-to-medium meetings
- _ Brainstorming sessions
- _ Contract negotiations
- _ Product demos
- _ Staff meetings
- _ Sales presentations

WebEx Meeting Center

WebEx Meeting Features and Benefits

Easy meeting scheduling. Integrate Tata Communications' Audio Conferencing to quickly schedule meetings.

Leverage Tata Communications' voice network. Our audio conferencing solution reaches around the world.

Meeting management. Automatically send email invitations from your name, and use scheduling options to send reminders prior to your meeting.

Presentation tools. Show slides, including any animations or builds within them; share documents, applications, videos, and flash files; and conduct Web tours.

Annotation tools. Point out important information during your presentation.

Take control of your meetings

Transfer files. Deliver files to another participant from your desktop.

Sound notification, polling and multiple presentation access. Facilitate an interactive session.

24x7 customer service. Assistance is always available for both audio and visual aspects of your presentation.

Note-taking panel. Take notes directly in the meeting window and send a transcript to all participants via email after the meeting.

Recording. Record and playback allow participants to access the audio and visual portions of the meeting after it has occurred.

Chat. Meeting attendees can communicate one-to-one or to the group with instant text messages.
