THINK AHEAD SOLUTIONS

For Small and Medium Enterprises

Step up to a reliable business-class network solution that senses your need for growth, through blazing connectivity

When your business is on the fast path to growth and needs high-speed connectivity to stay ahead, we sense you will need the advantage of an Internet Leased Line solution; one which offers reliable data connectivity and enables a host of Applications and Services. Gain the additional advantage of productivity-boosting collaboration and communication tools with InstaOffice, powered by Google Apps. Plus, our ILL solutions insulate your critical business data from online threats with all-round data security.

Internet Leased Line features

- Reliable Internet connectivity with redundancy on domestic and international backbones
- Flexible access plans with customized Bandwidth service/solutions
- Upgradability up to 1Gbps
- 99.5% - 99.95% uptime guarantee
- Committed Information Rate (CIR) guarantee, as applicable for each of the services offered
- Online usage statistics
- 24x7 Customer Support and a Dedicated Help Desk with proactive notifications and monitoring
- Dedicated Customer Relationship Manager

Gain the advantage of these business-enhancing services

VPN

When your business is eager to boost its overall level of productivity and gain a competitive edge, we offer the advantage of Layer 3 VPN service, which is delivered on our fully-meshed, private MPLS network.

Advantages:

- Robust and secure infrastructure which gives uninterrupted connectivity
- End-to-end managed WAN service
- Application level prioritization

InstaOffice (powered by Google Apps)

When you need to keep your business ahead of the curve, we sense you'll need a business solution that enhances office productivity and quickens your time-to-market.

Advantages:

- Improves employee productivity with access to a range of collaboration and communication applications like email, chat, calendars, documents and presentations - anytime, anywhere
- No CAPEX: Solution does not require additional hardware or software and requires minimum administration, resulting in tremendous time-and-cost savings
- Enhances business productivity with a 99.9% uptime guarantee, enabling less concern about system downtime

InstaCompute

When you need your business to instantly adapt to meet changing business needs, we sense that you will need a flexible, cost-effective infrastructure solution that scales up to demand.

Advantages:

- Increase computing capacity without increasing capital expenses
- Bring products to the market quicker, through instant service availability
- Rapidly add or remove resources at anytime to meet changing business needs

Content Delivery Network

When your business has online content that needs to be delivered as fast as possible over the Internet, with an improved user experience, we sense you'll need our Content Delivery Network service.

Advantages:

- The clustered Content Systems ensures seamless and quick delivery of heavy content (video, animation, images, software, etc.) from the nearest geographical node
- Cost-effective, live broadcasting solution that enables the broadcast of live content, over the Internet, to millions of viewers, in a high-quality, highly-reliable experience that rivals television

Managed Hosting

When your business is looking to enhance effectiveness, we sense you will need our Managed Hosting services to outsource your IT infrastructure and focus on your core business.

Advantages:

- Save on high upfront costs with OPEX-based Managed Hosting services
- Gain the freedom to scale your system requirements, as per your business needs
- Offload your effort in maintaining IT infrastructure and the cost associated with it, with our fully-managed solution
