

EASY RECOVERY FOR EVEN THE MOST COMPLEX INFRASTRUCTURE

**ENSURE BUSINESS CONTINUITY AND
REASSURE YOUR CUSTOMERS WITH A
DISASTER RECOVERY PLAN THAT'S
BUILT TO LAST.**

Be it through human error or natural disaster, your enterprise is constantly facing the threat of disruption. To maintain business continuity and meet stringent regulatory requirements, you need a robust disaster recovery strategy. But this is no easy task – an efficient solution needs the right processes, backed by proactive planning and delivered by experts.

With Tata Communications, you'll benefit from:

- A fully-managed service delivered by DR experts that monitor your infrastructure 24/7/365, as well as a dedicated SPOC for your DR
- Near-zero business disruption with enterprise-grade SLAs guaranteeing swift recovery and continual uptime
- Meet your compliance regulations with regular and comprehensive reports from your dedicated DR team

THE PROCESSES AND THE PEOPLE TO PROTECT YOUR BUSINESS

A devastating earthquake. A catastrophic cyber attack. Or simply an employee error. When disaster strikes your systems, it's your ability to recover that counts. Tata Communications' Disaster Recovery Services offer a fast, reliable solution that covers the entire disaster recovery lifecycle. Implemented across the hybrid cloud environment of your choice, from cloud to colocation, it's as comprehensive as it is reliable.

Laying the essential groundwork

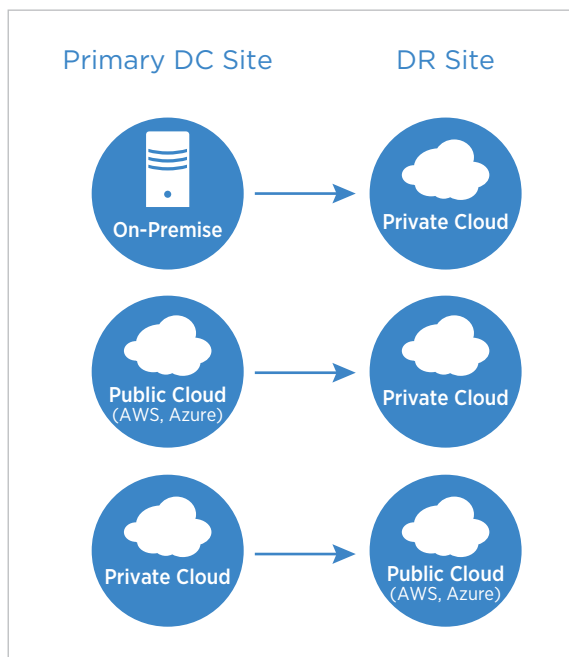

Our fully-managed service takes complete control over your infrastructure replication, from determining the order your applications are migrated to running regular pre-disaster drills.

Delivering complete continuity

If disaster does strike, we'll ensure an immediate and seamless transition to your secondary site. Enterprise-grade SLA's, with RTO/RPO guarantees, ensure near-zero business disruption and 99.9% uptime of your DR infrastructure.

Moving your enterprise forward

We keep a constant eye on your recovery site to make sure everything is running as it should. We'll send you the reports to meet your compliance needs. And when the dust settles, we'll direct the complex transition back to your primary site.

“Benefit from a fully managed DR solution for guaranteed business continuity. With our hybrid cloud Disaster Recovery Services, you can rest assured your business is in safe hands.”

WHY TATA COMMUNICATIONS?

- **Bespoke:** your detailed DR strategy is prepared by a team of experts that will cater for your specific business needs
- **Proactive:** pre-DR drills and tests ensure your IT infrastructure is well protected in case actual disaster strikes
- **Flexible:** with various deployment options, you can choose your source site, with in-house data centre, colocation, managed hosting and cloud all easily replicated to physical or cloud DR infrastructure
- **Fully managed:** our team of data centre and cloud experts ensure SLAs are met 24/7/365, with a dedicated DR SPOC always by your side
