SOLUTION

Tata Communications IZO™ SDWAN Managed Services, and IZO™ Hybrid WAN Services

Stable Level of Cost

No Latency

Increased Productivity

Stable Uninterrupted Network to 80+ locations

“Tata Communications has assisted in our company’s IT Transformation journey and Tata Communications Managed SDWAN Select along with IZO™ WAN provides a stable network to support our business operations. There has been significant improvement in productivity and user experience.”

Antonio Gelardi , Senior Manager - Network and Security, Hager Group

BUSINESS CHALLENGE

- As a trusted manufacturer of electrical distribution systems, Hager Group was dissatisfied with the MPLS links from their existing service provider
- They were looking for a strategic partner to help them transform their global connectivity with a cloud-ready network

OUR USP

- Tata Communications IZO™ SDWAN managed services with Versa along with IZO™ Internet WAN provides a comprehensive solution and global connectivity to Hager Group’s 80+ locations
- Managed SD-WAN overlay from design, delivery, operation and optimisation. An underlay of IZO™ Internet WAN circuits with predictable performance in major locations and with MPLS circuits in China and India. Together with our BYON functionality incorporated at few of Hager Group’s in-contract circuits were part of the solution

BUSINESS IMPACT

- Tata Communications hosted solutions have provided a one-stop-shop for global connectivity for Hager Group
- Hager Group has seen an increased performance in cloud applications
- Active-active SD-WAN connectivity provides a stable uninterrupted network which results in a greater end-user experience
- Hager Group now has a reliable connection to support their business operations and as a result have seen stable level of costs and an increase in productivity
- The solution enables seamless connectivity for Hager Group’s internal customers and is flexible to meet any future needs
