TATA COMMUNICATIONS

Are your global roaming services still relying on fragile, reactive and legacy carrier services

Do you often need to debate …

Where are the insights to manage roaming **transitions from 2G-3G to 5G networks** and build new services?

How do we **tap the data intelligence** to support increasingly **advanced new Human-to-Human (H2H)** and **Machine-to-Machine (M2M) use cases?**

How do we **create capacities** to manage **explosion of roaming data consumption** across geographies?

How do we mitigate the **threat of platform services disruption**, while **adopting new business models** and create **'Roam like home' experience?**

Tata Communications' Carrier Mobility Services resilient, intelligent and future-ready platform

Managed services
Orchestrated to enable hassle free roaming business management

- Roaming agreement management
- Testing services
- Clearing services
- Hosted services
- API platform

Value added suite
Designed to create and utilise real time intelligence

- Enhanced roaming security solutions
- Enhanced roaming reporting solution
- Intelligent identity validation services
- Intelligent roaming user management
- Intelligent conversion solutions

Connectivity services
Built to address roaming data complexities across 2G - 5G networks

- IPX Data roaming
- Signalling data

Tata Communications
A trusted global partner

A global powerhouse backed by 150-year-old Tata Group

End-to-end mobility solutions with 24×7 global support

One of the world's largest digital and subsea networks powering seamless 2G-5G roaming

Connects 4 out of 5 mobile subscribers worldwide for signalling, roaming and messaging

Award-winning leader in global mobility & IPX excellence, recognised by ROCCO, Juniper Research and Kaleido Intelligence
