TATA COMMUNICATIONS

TATA COMMUNICATIONS SMART OFFICE SOLUTION

Secure Wi-Fi, LAN and Internet, delivered as one managed service

Powered by HPE Networking

The office network has become the foundation for productivity, security and employee experience, but many enterprises still rely on fragmented environments and ageing infrastructure that were not designed for today's workplace. As hybrid work and IoT expand the attack surface and increase the complexity of connected environments, gaps between wired and wireless networks and limited visibility make it harder for IT teams to identify and resolve issues before they disrupt employees.

The impact is tangible. 87% of wireless teams reported visibility gaps that hindered effective Wi-Fi troubleshooting, while 81% of organisations experienced financial losses from wireless security incidents in 2025, according to a leading industry study. As network complexity continues to grow, the modern workplace needs a simpler, more secure network that delivers greater visibility and a seamless experience for employees.

Tata Communications Smart Office Solution

Tata Communications Smart Office Solution, powered by HPE Networking, brings together secure LAN and Wi-Fi, Internet connectivity, cloud-managed operations and AI-driven insights in one integrated solution. Designed to simplify the modern workplace, it replaces fragmented network environments with a seamless, centrally managed experience.

Simplified operations that reduce complexity, improve cost efficiency and deliver a consistent user experience.

Plug-and-play deployment with zero-touch provisioning, enabling seamless integration from Day Zero.

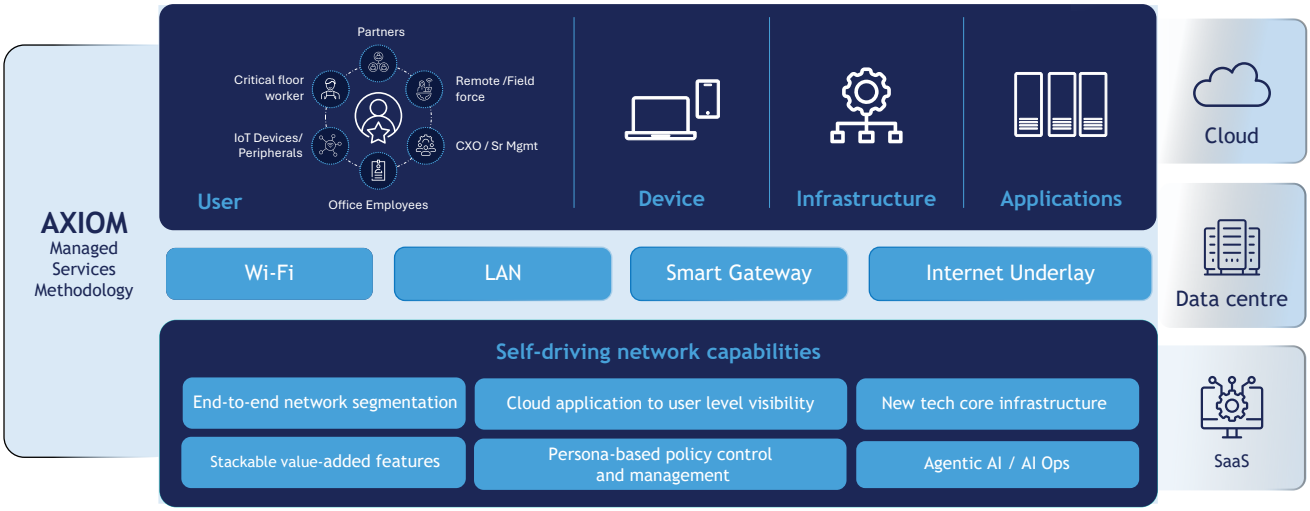

Cloud-managed platform with AI-powered insights and self-driven network that simplify monitoring, optimisation and troubleshooting.

- **30% cost savings** with integrated, end-to-end solutions
- Policy-driven platform with **up to 99.9% uptime**
- **95% drop in help desk calls** due to Wi-Fi Insights
- **6x faster** resolution and **50% decrease** in IT dispatches
- **Edge-to-cloud security** for consistent threat protection
- **Flexible pricing models** that fit your business needs

Smart Office Solution architecture

Simplified out-of-the-box connectivity solution with integrated LAN, Wi-Fi and Internet connectivity.

Value of our integrated solution offering

Modular to build, simple to run, secure by design and aligned to how you consume services.

Self-driving network

- Agentic AI detects, diagnoses and resolves issues in real-time
- Large Experience Model delivers accurate root-cause analysis, not raw alerts
- Autonomous AIOps cuts operational overhead and help desk dependency

Modular by design

- One managed platform across Internet, Broadband, Wi-Fi and LAN
- Stackable components consumed individually or as a bundle
- Right-sized packages from 10 to 320 users and up to 15,000 sq. ft. per site

Unified policy management

- Cloud-native orchestration for one unified policy across LAN, Wi-Fi and WAN
- Reusable policy repository with intent-based automation for faster rollouts
- Identity-based Zero Trust with dynamic segmentation

Flexible consumption

- Pay-as-you-go across SaaS, on-premises or virtual private cloud
- Scale bandwidth, sites and users as the business evolves
- Time-bound, SLA-backed delivery across all network services

Self-serve simplicity

- Single AI-native portal for every network service and site
- Real-time visibility into performance, clients and change management
- Template-based configuration and zero-touch provisioning for faster expansion

TATA COMMUNICATIONS

TATA

Custom build your Smart Office Solution in two steps

Office size and user count determine the right package for your workplace.

Step 1

Identify your office area
Total area in sq. ft.

Step 2

Determine the number of endpoints
Users and connected devices

Your recommended package

Get your right-sized smart office solution
Custom-sized from Nano to Extra Large

Unlock smarter workplace outcomes

- Seamless hybrid working
- Energy efficient operations
- Optimised space utilisation
- Connected collaboration spaces
- Actionable workplace insights
- Secure workplace access

Analyst recognitions

Gartner

- **Tata Communications** - Leader in the Gartner Magic Quadrant™ for Global WAN Services for 13th year in a row (2026)
- **HPE Networking** - Leader - Enterprise Wired & Wireless LAN Infrastructure in Gartner Magic Quadrant (2026)

FROST & SULLIVAN

Tata Communications - Leader in Frost & Sullivan - Frost Radar Global Carrier Managed Network Services (2025)

AVASANT

Tata Communications - Leader in Avasant RadarView™ for Enterprise Network Managed Services (2025)

Make your workplace think for itself

Transform your workplace with a Smart Office Solution built for you.
