

Tata Communications Cyber Threat Intelligence as a Service (CTIaaS)

Actionable Threat Intel.
No Heavy Investments.

In today's digital economy, cyber threats are no longer isolated IT issues – they're business-critical risks. With cybercrime projected to cost **\$15.63** trillion by 2029 (Cybersecurity Ventures), attackers are evolving faster than most defenses. Traditional detection methods can't keep pace, and many organisations lack the visibility and actionable intelligence to protect their assets, reputation, and customers – before the damage is done.

Are you prepared for what's coming?

The majority of ransomware victims are mid-sized enterprises
- Gartner

17% of cyberattacks will use generative AI by 2027
- Gartner

The Rising Need for Cyber Threat Intelligence

Alert Fatigue

Too many alert sources,
not enough insight

Lack of Visibility

Blind spots across your
digital ecosystem

Evolving Threats

Smarter attackers,
faster campaigns

Dark Web Risks

Leaked credentials and
chatter beyond your reach

Resource Constraints

Building a threat intel team
is costly and complex

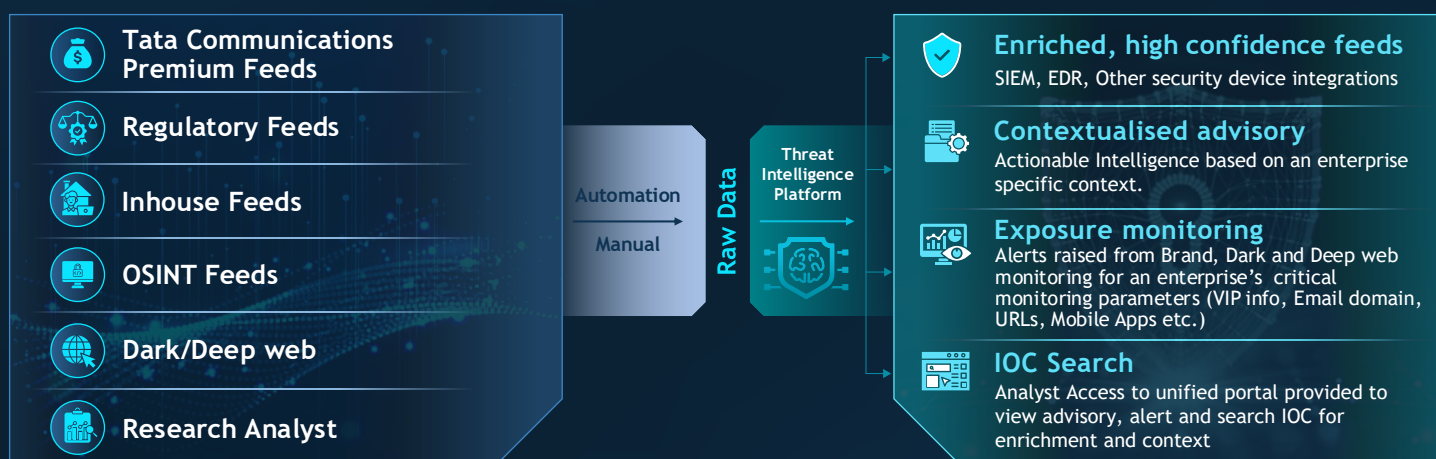

Tata Communications Cyber Threat Intelligence as a Service

Tata Communications Cyber Threat Intelligence as a Service (CTIaaS) is a subscription-based service that provides curated, actionable threat intelligence in real-time to help enterprises better anticipate, detect, and respond to cyber threats with speed and clarity.

Early Threat Detection Powered by Global Network Telemetry

Tata Communications, as one of the world's largest telecom providers, handles nearly **30%** of the world's internet traffic. With this unparalleled network visibility and global DDoS scrubbing infrastructure, we enrich our threat intelligence with early Indicators of Compromise (IOCs), including botnet traffic and command-and-control infrastructure — giving you a critical early warning advantage.

Cyber threat intelligence for proactive protection

Key Benefits

IOC Feeds and Real-Time Alerts

Respond faster to known threats with continuously updated threat indicators from over 60 integrated global and regional feeds

Contextualised Advisory Reports

Stay ahead of emerging campaigns, TTPs, and vulnerabilities — tailored to your technology environment and threat profile

Reduced False Positives

Analyst-enriched, curated intelligence cuts through the noise, helping security teams focus on credible, actionable alerts

Brand and Dark Web Monitoring

Identify impersonation, data leaks, or stolen credentials — with real-time surveillance across deep and dark web sources targeting your specific environment

Attack Surface Management

Discover and reduce risk from externally exposed digital assets, domains, and misconfigurations

Seamless Integration

Easily operationalise intelligence with SIEM, SOAR, firewalls, and other platforms using standard APIs

Flexible Service Packages

Capability Offerings	CTI-Standard	CTI-Premium	CTI-Premium+
High fidelity threat intelligence feeds via API	Yes	Yes	Yes
Contextualised Threat Advisories tailored to customers application stack	Yes	Yes	Yes
Threat Indicator lookup for intel on self-service TC ^x Portal	Yes	Yes	Yes
Centralised dashboards and reports download within TC ^x Portal	Yes	Yes	Yes
Weekly Threat Advisory Summary Report	Yes	Yes	Yes
Attack Surface Management Services	-	Yes	Yes
Brand and Executive Monitoring	-	Yes	Yes
Brand Detection - Takedown services	-	Yes	Yes
On-demand search assistance on dark web for exposed customer data	-	Yes	Yes
Dark web monitoring service	-	-	Yes
Data leak recovery support on the Dark Web	-	-	Yes
Request on additional insights on Threat Campaigns/APT groups with Report - up to 5 reports/quarter	-	-	Yes
Expert analysis of threat samples submitted by the customer (up to 5 /quarter) with actionable reporting	-	-	Yes

Tata Communications Advantage

Unmatched Visibility - 30% of global internet traffic flows through our backbone.

Seamless Integrations - Easy integration with any existing Security Platform or solutions.

Trusted Globally - NPS of 80+ with threat ops run across Chennai, Pune, and Dubai SOCs.

Massive Scale - 3.5 Tbps traffic screened daily, 9.5Bn events processed, 270K IOCs tracked every day.
