

ENJOY MANAGED HOSTING THAT DELIVERS UNPARALLELED AGILITY TO MEET CHANGING BUSINESS NEEDS

GLOBAL, STATE-OF-THE-ART, SECURE DATA CENTRES TO MEET ALL YOUR HOSTING REQUIREMENTS

- **Enterprise class, Tier 3 data centres located in 44 major metro markets worldwide**
- **ISO 20000, 27001 and 14001 certified, ensuring high standards for infrastructure operations management**
- **Industry-leading SLA's, proactive 24x7x365 monitoring and management from central Global Services Management Centre**

Whether you're operating a high-traffic website, a CPU-intensive application or complex databases, Tata Communications' Dedicated Hosting service can help you save time while reducing cost. We provide you with a turn-key solution that includes hardware, operating systems and managed databases – all coupled with daily, proactive system management.

Your dedicated servers are hosted at one of our state-of-the-art Tier 3 data centres, built to TIA 942 Tier-3 standards, monitored and managed from our central Global Service Management Centre. Our data centres have been awarded certifications for high quality and efficient operations. In addition, our service delivery and management processes adhere strictly to industry-standard ITIL service delivery guidelines, ISO and IEC operational specifications.

To complement your Dedicated Hosting platform, you can also choose from value-added services for security (managed firewalls, DDoS mitigation, UTM), storage, colocation, managed backup, managed DB and InstaCompute, our cloud-based IT infrastructure solution. Our solutions are designed to be modular, thus helping you save time and money, while consolidating your resources—making your business operations more efficient.

Tier 3 data centre facilities with guaranteed SLA's

Multiple layers of protection for servers, including physical security, CCTV monitoring, and managed caged environments

Fixed price contracts that provide you with predictable costs as per your requirements and budgets
