

UNIFIED COMMUNICATIONS : JAMVEE™ FOR GLOBAL SERVICE PROVIDERS

BE THE NAME CUSTOMERS COUNT ON FOR UNIFIED COMMUNICATIONS

ENHANCE YOUR CUSTOMERS' COLLABORATIVE CAPABILITIES AND SECURE NEW REVENUE STREAMS WITH OUR TURNKEY SOLUTION

Empower your customers to collaborate their way – any time, anywhere and on any device. Tata Communications' jamvee™ allows you to leverage our network services and Global Meeting Exchange™ network to give you global reach and capabilities that puts your United Communications (UC) offering streets ahead of the competition.

With jamvee™, you and your customers can:

- Enhance business processes and agility by connecting users, tools and existing technologies
- Increase productivity and staff retention through better teamwork that enhances morale
- Create, act and deliver to market faster through effective, collaborative working
- Maintain control by having the freedom to work with any enterprise-based, quality UC client
- Slash audio conferencing costs by getting on-net with Tata Communications Global SIP Connect.

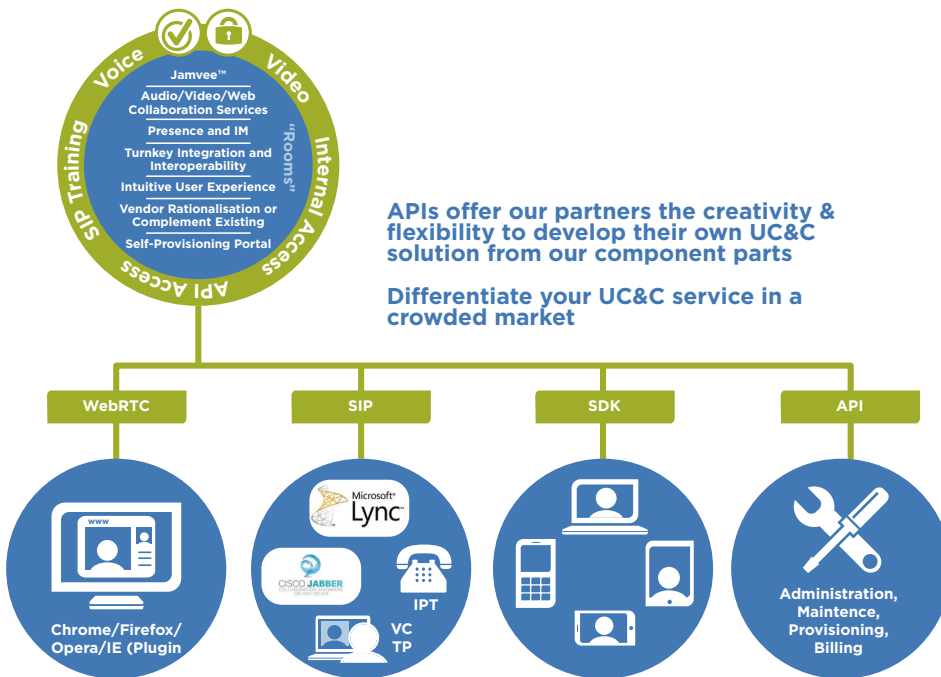

BETTER COLLABORATION MEANS BETTER BUSINESS

As a global service provider, the pressure is on for you to meet the accelerating demand for solutions that bring people and tools together, across channels worldwide. According to IDG, 90% of organisations plan to invest in Unified Communications and Collaboration (UCC) in the next 12 months. And 74% of enterprise organisations are accelerating their UCC plans driven by the explosion in devices like smartphones and tablets.

Clearly the time to seize this opportunity is now. But what's less obvious is how to deliver a high quality, flexible service while keeping your costs down.

Seamless, secure collaboration any time, anywhere

Tata Communications jamvee™ is a white-label service that allows your customers to collaborate 'their way' using both new and legacy systems. Backed by our secure, world-class network, this cloud-based service assures consistency and global reach for your customers – and at zero CAPEX cost to you. We also provide APIs – so whether you want to integrate our solution into your own or develop something new, you can.

A world-class service you can count on

Where other solutions are platform-dependant, jamvee™ is truly interoperable with all SIP and GVPN solutions for voice or data. Offered as a fully managed, award-winning service backed by our world-class network infrastructure, it makes it easy for you to deliver your customers the very best in service and global reach

2014 Asia-Pacific UC As A Service Product Line Strategy Award' Frost & Sullivan

“jamvee™ combines interoperability and ease of use with the scale and resilience of Tata Communications' Tier-1 network. Co-workers, suppliers and customers at organisations around the globe will benefit from the collaboration opportunities now possible with jamvee™.”

—O.J. WINGE, CEO, ACANO
