

IS YOUR EMAIL SYSTEM SAFE?

LACK OF PROPER UPFRONT PROTECTION CAN PUT YOUR BUSINESS AT RISK

Sophisticated virus and spam attacks, including malware and trojans, are the realities that your email system faces every day.

If left unaddressed, these agents can impact employee productivity, network resources, and potentially expose you to regulatory consequences.

ReadyMailSecure from Tata Communications provides a frontline defense against harmful agents by filtering and quarantining spam, viruses, malware and inappropriate content before it reaches your users, protecting you against security breaches and productivity losses.

Moreover, by deploying ReadyMailSecure you gain enterprise-grade messaging and advanced security capabilities with a simple rollout and no capital expenses.

Key Benefits

- Stop harmful emails before they reach your network
- Use Internet bandwidth more efficiently
- Increase user productivity
- Leverage automatic disaster recovery capabilities
- Define email policies in an easy-to-use administrative panel
- Comply with regulatory requirements
- Deploy rapidly and scale on-demand
- Manage costs with a predictable pay-per-use model
- Integrate with your existing email environment

Key Features

- Attack blocking and connection protection
- 99.99% virus protection and 99.999% spam filtering
- Whitelist/blacklist and quarantine notifications
- Weekly or monthly analytic reports
- 24x7 helpdesk and support
- 99.9% to 99.999% uptime

Enforce Email Policies

ReadyMailSecure seamlessly manages compliance requirements by automatically enforcing corporate-level policies regarding acceptable content, confidentiality, archiving and more. Avoid regulatory or financial consequences by proactively addressing potentially harmful misuse of your email system.

Defend Your Network

Stop viruses, spam and other threatening content before it enters your network. We protect your infrastructure while driving efficiency improvements for network resources and employee productivity.

Automatic Disaster Recovery

ReadyMailSecure provides seven days of unlimited auto-spooling of messages, in a redundant queue, in case your email server is not reachable. There are no size limits, so your inbound mail is always guarded against unexpected events.

Simple Web Administration

ReadyMailSecure provides a convenient web console for administration. The console provides real-time configuration and policy modifications, monitoring and alerting, as well as comprehensive reporting for administrators.

Managed and Monitored

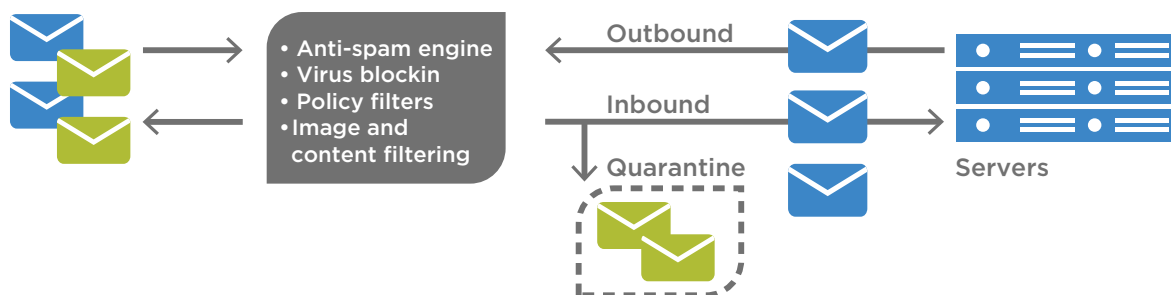

ReadyMailSecure is backed by industry-leading SLAs and 24x7 support. We provide the highest security levels, which are ISO 20000 and 27001 and SAS

70 Type 2 certified, have a WebTrust seal and leverage our certifications and ITIL framework to guarantee operational excellence and a consistently high level of security.

Cost-effective Solution

With our on-demand, hosted model, your costs are predictable and based on usage. Additionally, by eliminating spam and other malicious content before it enters your network, you reduce Internet bandwidth use by up to 80%.
