

IT SECURITY COMPLIANCE EXPERTISE THAT GROWS SUCCESS AND CUTS RISK

MAINTAIN THE CONFIDENTIALITY, INTEGRITY AND AVAILABILITY OF SENSITIVE ENTERPRISE DATA WITH COMPREHENSIVE CONSULTING, AUDITING AND STRATEGIC SECURITY PLANNING

Today's organisations rely heavily on large, complex IT infrastructure to process huge volumes of sensitive data – not just for day-to-day operations but for long-term storage too. From employees' and customers' personal information through to confidential financial records and precious intellectual property, there's a critical need to protect data to comply with global regulatory demands and ensure the future success of the business.

Tata Communications' Governance, Risk and Compliance consulting service first assesses your organisation's current security position. It then identifies gaps and ensures that data processes adequately meet regulatory compliance requirements everywhere you do business, so that you:

- Reduce the risk and cost of compliance by planning your roadmap to best-practice security
- Meet IT internationally recognised compliance frameworks
- Ensure protection of intellectual property – from SLAs to source codes
- Secure confidentiality of business impact information concerning finance, mergers/acquisitions etc.
- Maintain brand reputation and avoid costly damage by identifying data leakage risks from cyberattacks or inadequate processes

GROWING COMPLIANCE COMPLEXITY DEMANDS AN EXPERT GUIDING HAND

Imagine the impact of a sensitive data leak. Apart from exposing your organisation to multiple information security compliance breaches, the damage to your public reputation and future competitiveness could be catastrophic. As data protection regulation continues to evolve hand-in-hand with fast-developing new technology frontiers, meeting increasingly stringent requirements is more challenging than ever before. And the bigger your enterprise, the bigger the challenge – with the compliance landscape differing vastly in many areas of the world.

That's where Tata Communication's GRC consulting service comes in. Our team assesses the current security posture of your organisation against the latest international frameworks – including (but not limited to) ISO27001, PCI-DSS and NIST. This gives you a complete picture of enterprise risk associated with policy, process, infrastructure security, operational security, managing confidential and critical documents and more.

Through gap assessments, you'll gain a clear understanding of your organisation's current IT security status. Then we'll guide you towards corrective actions that drive your business priorities.

INTRODUCING TATA COMMUNICATIONS' GRC CONSULTING SERVICE

Security risk and consulting assessment:

- Gap assessment against security frameworks
- Security audit against industry best practice
- Security strategy to mitigate the risks identified

Compliance assessment and planning:

- Enabling you to conduct regular internal assessments and audits to comply with various frameworks and certifications such as PCI-DSS, HIPPA, SoX, ITGC, RBI Guidelines, IRDA Guidelines etc.
- Create compliance reports highlighting non-compliant controls/clauses and associated risks, including recommendations to meet compliance requirements

Data privacy assessment:

- Business process flow audit and strategy development helps you comply with data security and privacy acts such as GDPR (EU) and DSCI Data Privacy (India)
- Data point capture for Personal Identifiable Information (PII) and PII controls enables review of data privacy principles implementation
- Identification of security weaknesses of existing PII data and recommendation on controls addresses any gaps

POWERED BY TATA COMMUNICATIONS

Tata Communications provides unparalleled reach and connectivity options, with a subsea and terrestrial network covering 700,000km, which could circumnavigate the globe more than 17 times.
