Notes to Segments:

The Company's reportable business segments are Voice Solutions, Data and Managed Services, South Africa Operations and others. The composition of the reportable segments is as follows:

Voice Solutions include International and National Long Distance Voice services.

Data and Managed Services include Corporate Data Transmission services, data centers, virtual private network signalling and roaming services, television and other network and managed services.

South Africa Operations are carried out by the Company's subsidiary Neotel Pty Ltd. and comprise wholesale international voice and data transit, enterprise business solution services for the wholesale and corporate market, telephony and data services for retail customers in South Africa.

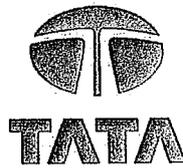

Others primarily comprise a Joint venture business.

Revenues and interconnect charges are directly attributable to the segments. Network and transmission costs are allocated based on utilization of network capacity. License fee for Voice Solutions and Data and Managed Services have been allocated based on adjusted gross revenues from these services.

Depreciation and certain other costs, which were hitherto not allocated to segments, have been allocated to segments during the quarter ended June 30, 2014 based on various allocation parameters. Segment result is segment revenues less segment expenses. Other income and exceptional items have been considered as "Other Unallocable Expenses (net)".

Further assets and liabilities including fixed assets, which were earlier not allocated to segments, have been allocated to segments on similar basis of related revenue and expense.
