IZO™ PRIVATE CONNECT

NOW YOU CAN BE PRIVATE IN PUBLIC

IZO™ PRIVATE CONNECT LINKS BUSINESSES TO CLOUD SERVICES OVER MPLS OR ETHERNET THROUGH ONE SINGLE PROVIDER GLOBALLY, TO ENSURE NETWORK PERFORMANCE.

Through global agreements with Alibaba Cloud, Tata Communications' IZO™ Private Connect simplifies and provides faster on-boarding to the world's leading private cloud providers.

PREDICTABLE: Get guaranteed throughput and availability, with Service Level Agreements (SLAs), consistent network performance.

SIMPLIFIED: Reduce the complexity of network management with a single global relationship that is fully managed, a single bill, and 24x7x365 customer service.

SEAMLESS: Connect to the Alibaba Cloud and data centres over our global Tier-1 network — one site to multiple hubs.

SECURE: Protect enterprise data while enjoying dedicated network capacity and high speeds.

A leader in global network solutions, Tata Communications is uniquely positioned as the only telecommunications company with presence across six continents, the largest, wholly-owned subsea cable network, and more than 1 million sq. ft. of data centre space in 44 locations worldwide.

MARKET TRENDS

97% of respondents say their organisation has adopted cloud computing to some extent.

THE REALITY OF CLOUD COMPUTING - HAS IT LIVED UP TO THE HYPE? -TATA COMMUNICATIONS 2015

More than 50% of enterprises rate enterprise-grade network services from their cloud providers as very important.

"ENTERPRISE NETWORKING FOR THE CLOUD AGE" — OVUM 2015
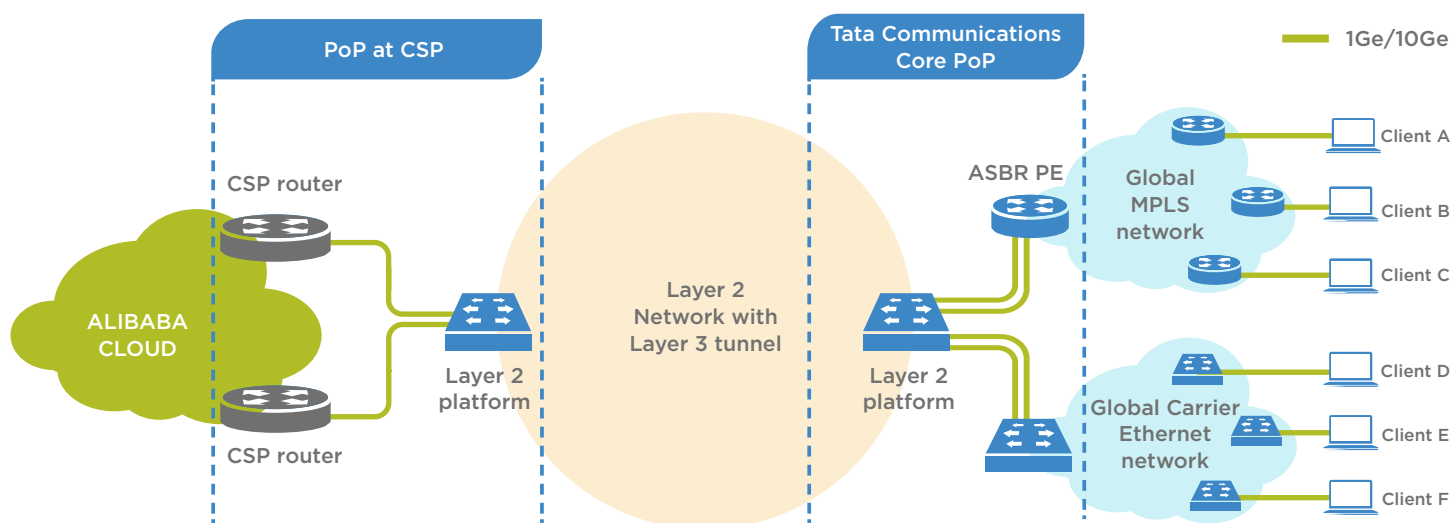

Everybody's Network Cloud

As part of a cloud enablement platform, companies tap into an entire global ecosystem that provides secure, high performance connections between enterprises, cloud providers and third party data centre partners — ultimately delivering a high quality end user experience.

### IZO™ PRIVATE CONNECT SITE ACCESS TO ALIBABA CLOUD
