

# IZO™ PRIVATE CONNECT

## TURN YOUR IP VPN INTO A VIP VPN

**IZO™ Private Connect links businesses to Google Cloud IaaS and PaaS over MPLS through one single provider globally, to ensure network performance.**

Tata Communications' IZO™ Private Connect for Google Cloud Partner Interconnect simplifies and provides faster on-boarding to Global Cloud Platform

**PREDICTABLE:** Get guaranteed throughput and availability, with Service Level Agreements (SLAs), consistent network performance.

**SIMPLIFIED:** Reduce the complexity of network management with a single global relationship that is fully managed, a single bill, and 24x7x365 customer service.

**SEAMLESS:** Connect to the top public clouds and data centres over our global Tier-1 network — one site to multiple hubs.

**SECURE:** Protect enterprise data while enjoying dedicated network capacity and high speeds.

A leader in global network solutions, Tata Communications is uniquely positioned as the only telecommunications company with presence across six continents, the largest, wholly-owned subsea cable network, and more than 1 million sq. ft. of data centre space in 44 locations worldwide.

## MARKET TRENDS

Cloud adoption strategies will influence more than 50% of IT outsourcing deals through 2020.

- GARTNER, FEBRUARY 2017

Business increasingly recognize that the performance of a cloud deployment is only as good as the network that delivers it.

- PETER HALL,  
PRINCIPAL ANALYST, OVUM

## EVERYBODY'S NETWORK CLOUD

As part of a cloud enablement platform, companies tap into an entire global ecosystem that provides secure, high performance connections between enterprises, cloud providers and third party data centre partners – ultimately delivering a high quality end user experience.

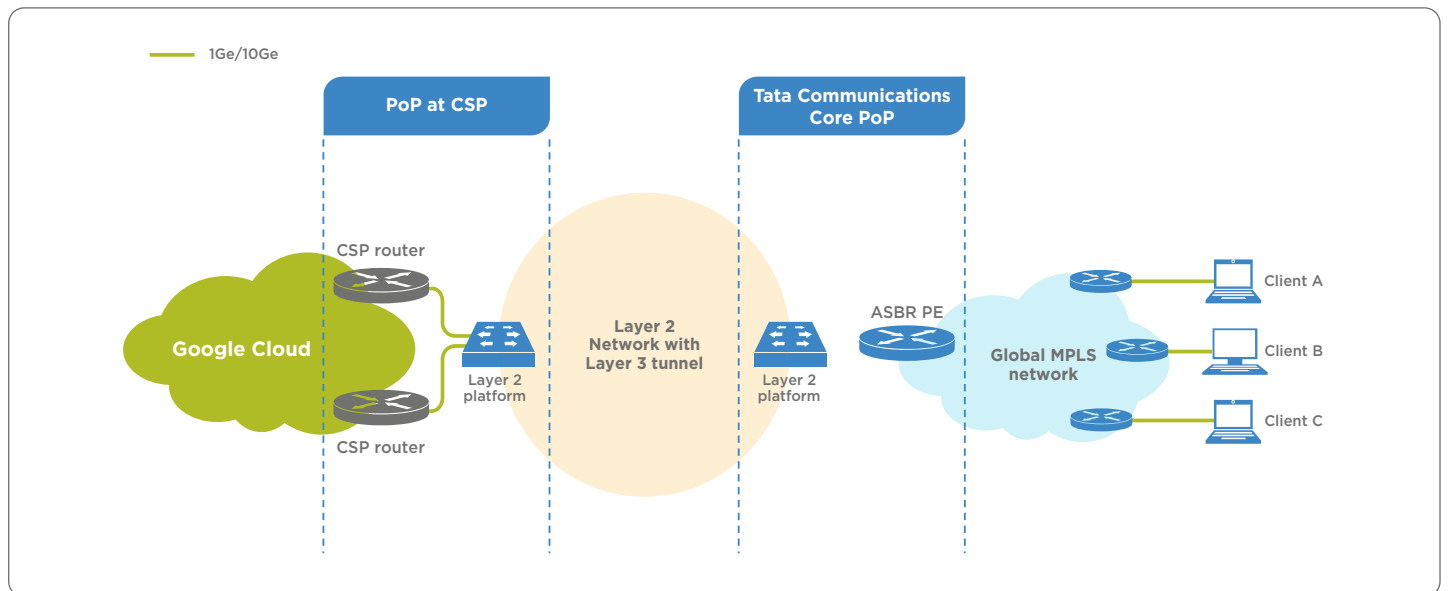

## IZO™ PRIVATE CONNECT SITE ACCESS TO GOOGLE CLOUD

IZO™ Private Connect site	Google Cloud Platform and G Suite via Data Centre Provider	Google Cloud Partner Interconnect
Amsterdam	Yes	
London		Yes (dual site)
Paris	Yes	
Ashburn	Yes	
Chicago		Yes (dual site)
Dallas	Yes	
Mumbai		Yes (dual site)
Singapore	Yes	Yes (dual site)
Tokyo	Yes	

IZO™ leverages Tata Communications' major global network diverting customer traffic onto the Internet at the customer premise, saving costs and helping to power a cloud-enabled WAN implementation.
