

MANAGED SECURITY SERVICES: **ADVANCED ENDPOINT SECURITY**

DYNAMIC ENDPOINT SECURITY SOLUTION WITH EXPERT MANAGED SERVICES

STOP RANSOMWARE AND MALWARE ATTACKS IN THEIR TRACKS BEFORE THEY COMPROMISE YOUR BUSINESS

A rapid rise in the threat from advanced file-based, as well as file-less techniques, demands a more agile approach to enterprise security. By subscribing to Tata Communications' Advanced Endpoint Security Service, you can bring 24/7/365 centralised management and monitoring of endpoint security solutions to the workstations, servers and hosting infrastructure endpoints on which your business success depends.

KEY BENEFITS INCLUDE:

Smooth, cost-effective implementation by seasoned endpoint security experts: reducing malware risk and the costly disruption of high in-house team turnover

Stay ahead of the threat by accessing best-in-class technology: delivered through our partnership with a leading endpoint security vendor

Scale security around your business: with strategy-focused solutions that grow with you

Easy access to transparent, comprehensive reporting: for the insights you need to make informed business decisions

Ensure 'compliance plus': with advanced security solutions and managed services that reach beyond HIPAA, ISO 27001 and PCI-DSS etc to align with multiple regulations and standards

360-degree security: diverse platforms and services that protect your organisation from multi-vector threats. Leverage E2E prevent, protect, detect and response mechanisms as part of a comprehensive MSS suite.

SMARTER SOLUTIONS FOR EVOLVING THREATS

Overwhelming cyberattacks are increasingly being launched via malicious apps on endpoint devices connected to the corporate network. It follows that, if your security team is looking for an effective strategy to cut the risks, it needs a multi-layered approach to endpoint security that covers the following bases:

Full security suite with personal firewall, antivirus solution, encryption, device control, intrusion detection and application controls etc.

Continuous detection that deploys data exploration instantly in the event of malware activity

Centralised security management via a console to manage endpoint environment

Incident response that instantly implements a centralised, automated tool to tackle threats

Comprehensive data protection through a segregated network with effective data encryption, file integrity, data access monitoring and data asset protection

Immediate incident remediation at the time of detection. This is through a security management tool that improves the visibility of possible threats and prevents malware attacks - before they happen.

360-degree security portfolio from Tata Communications

Drive visibility and context by leveraging capabilities for predictive, preventive, detective and response for a continuous life-cycle management tied to technology and processes via integrated services of the MSS suite

FULLY MANAGED, ROUND-THE-CLOCK: INTRODUCING TATA COMMUNICATIONS' EPP/EDR SOLUTION

Tata Communications' fully-managed Advanced Endpoint Security Service delivers against all these requirements - offering 24/7/365 monitoring and management of endpoint security with threat remediation. By leveraging a blend of technologies and services, it also takes care of:

Malware protection

Advanced persistent threats

Endpoint and email encryption

Ransomware protection

Zero-day attacks

Endpoint data loss prevention

Dynamic threat response

ADVANCED ENDPOINT SECURITY: KEY FEATURES

- Choice of dedicated, leverage or cloud-based deployment options
- Customer service portal for full visibility and control
- Flexible commercial model based on active endpoints/licence numbers
- Performance and health monitoring to ensure availability and compliance
- Upgrades and patch management
- Backup and recovery
- Emergency incident response during outbreak scenarios
