

INCREASE BUSINESS AGILITY WITH VMWARE ENABLED IZO™ CLOUD PLATFORM

Tata Communications enhances the IZO™ Cloud Platform with VMware technologies to offer enterprises seamlessly grow across cloud forms

Easily build a hybrid high-performance IT infrastructure, retaining the critical legacy systems, coexisting with new age solutions

Seamlessly move or integrate your VMware-based workloads from your datacentre to IZO™ Private Cloud or to VMware enabled AWS Public Cloud

Keep managing your existing environments with the VMware tools you already use, while modernising your applications with cloud-native services

The IZO™ Cloud Platform & Solutions are delivered by Tata Communications, powered by VMware, and run on IZO™ Private Cloud infrastructure

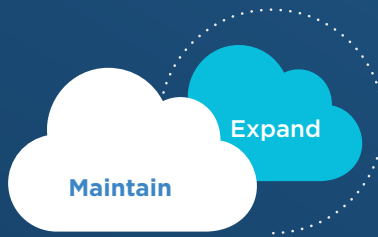

Customer can decide strategically across on-premise data centre & cloud

Infrastructure & Application Migration

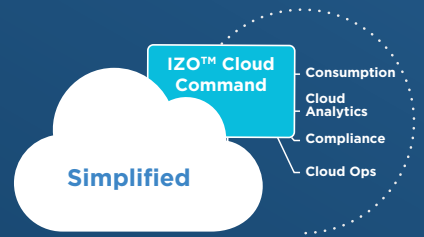

- Resource group mobilisation
- Datacentre movement
- Infrastructure refresh

Data Centre Extension & DR

- Footprint expansion
- On-demand capacity
- DR DC replacement

Simplified Management

- Streamline management
- Implement single pane of glass for monitoring

As per 451 research, migrating existing on-premises applications to off-premises/cloud environments with minimal changes to the application code or business logic can be a game changer for the business, but this can only be achieved through a professional approach with consultative planning and implementation.
